

Biohacking Training Webinar

Lesson 2 – Sunday 3rd September, 2017

8pm (Brisbane time) – Aussie & UK.

10am Monday 4th September (Brisbane time) – USA (Sunday evening)

The pH Regulatory System of the Body

How people can get into trouble being too alkaline and how acidifying can bring back balance. What? Sound shocking? Confused? You won't be after this session. We take pH concepts to a new level of understanding beyond the simplistic thinking that permeates much of the alternative and natural health field today regarding acid/alkaline balance. pH is a measure of biochemical speed & resistance and also reflects a magnetic factor - and it must be understood that it is only the tail of a much larger biochemical dog.

Electrolyte and Mineral Issues

Of prime importance in the consideration of any imbalance that any individual might experience is what is going on with minerals/electrolytes in the body. Electrolytes = electricity and one's body can have too much or too little and either situation is a precursor for the manifestation of issues with the tissues that unfold in many directions.

Powerhouse Topic for the webinar

According to the latest statistics one out of every two people you are ever likely to come across or work with will die from cardiovascular disease. Luckily, a very well-known colloidal chemist called Thomas Riddick discovered that urine conductivity readings are a key indicator for cardiovascular and renal risk. During this powerhouse topic I will be introducing you to the Conductivity Meter and showing you how simple it is to assess whether the cardiovascular and renal system are at risk.

With this knowledge and understanding you will be empowered to such extent that you will have the ability to save the lives of 50% of the people you work with (including yourselves of course).

You could literally run a renal cardiovascular practice doing little more than what you will be learning here.

Discussion / Q & A
